Technical solutions for the project
«Construction of Waste Sorting and
Recycling Plant»

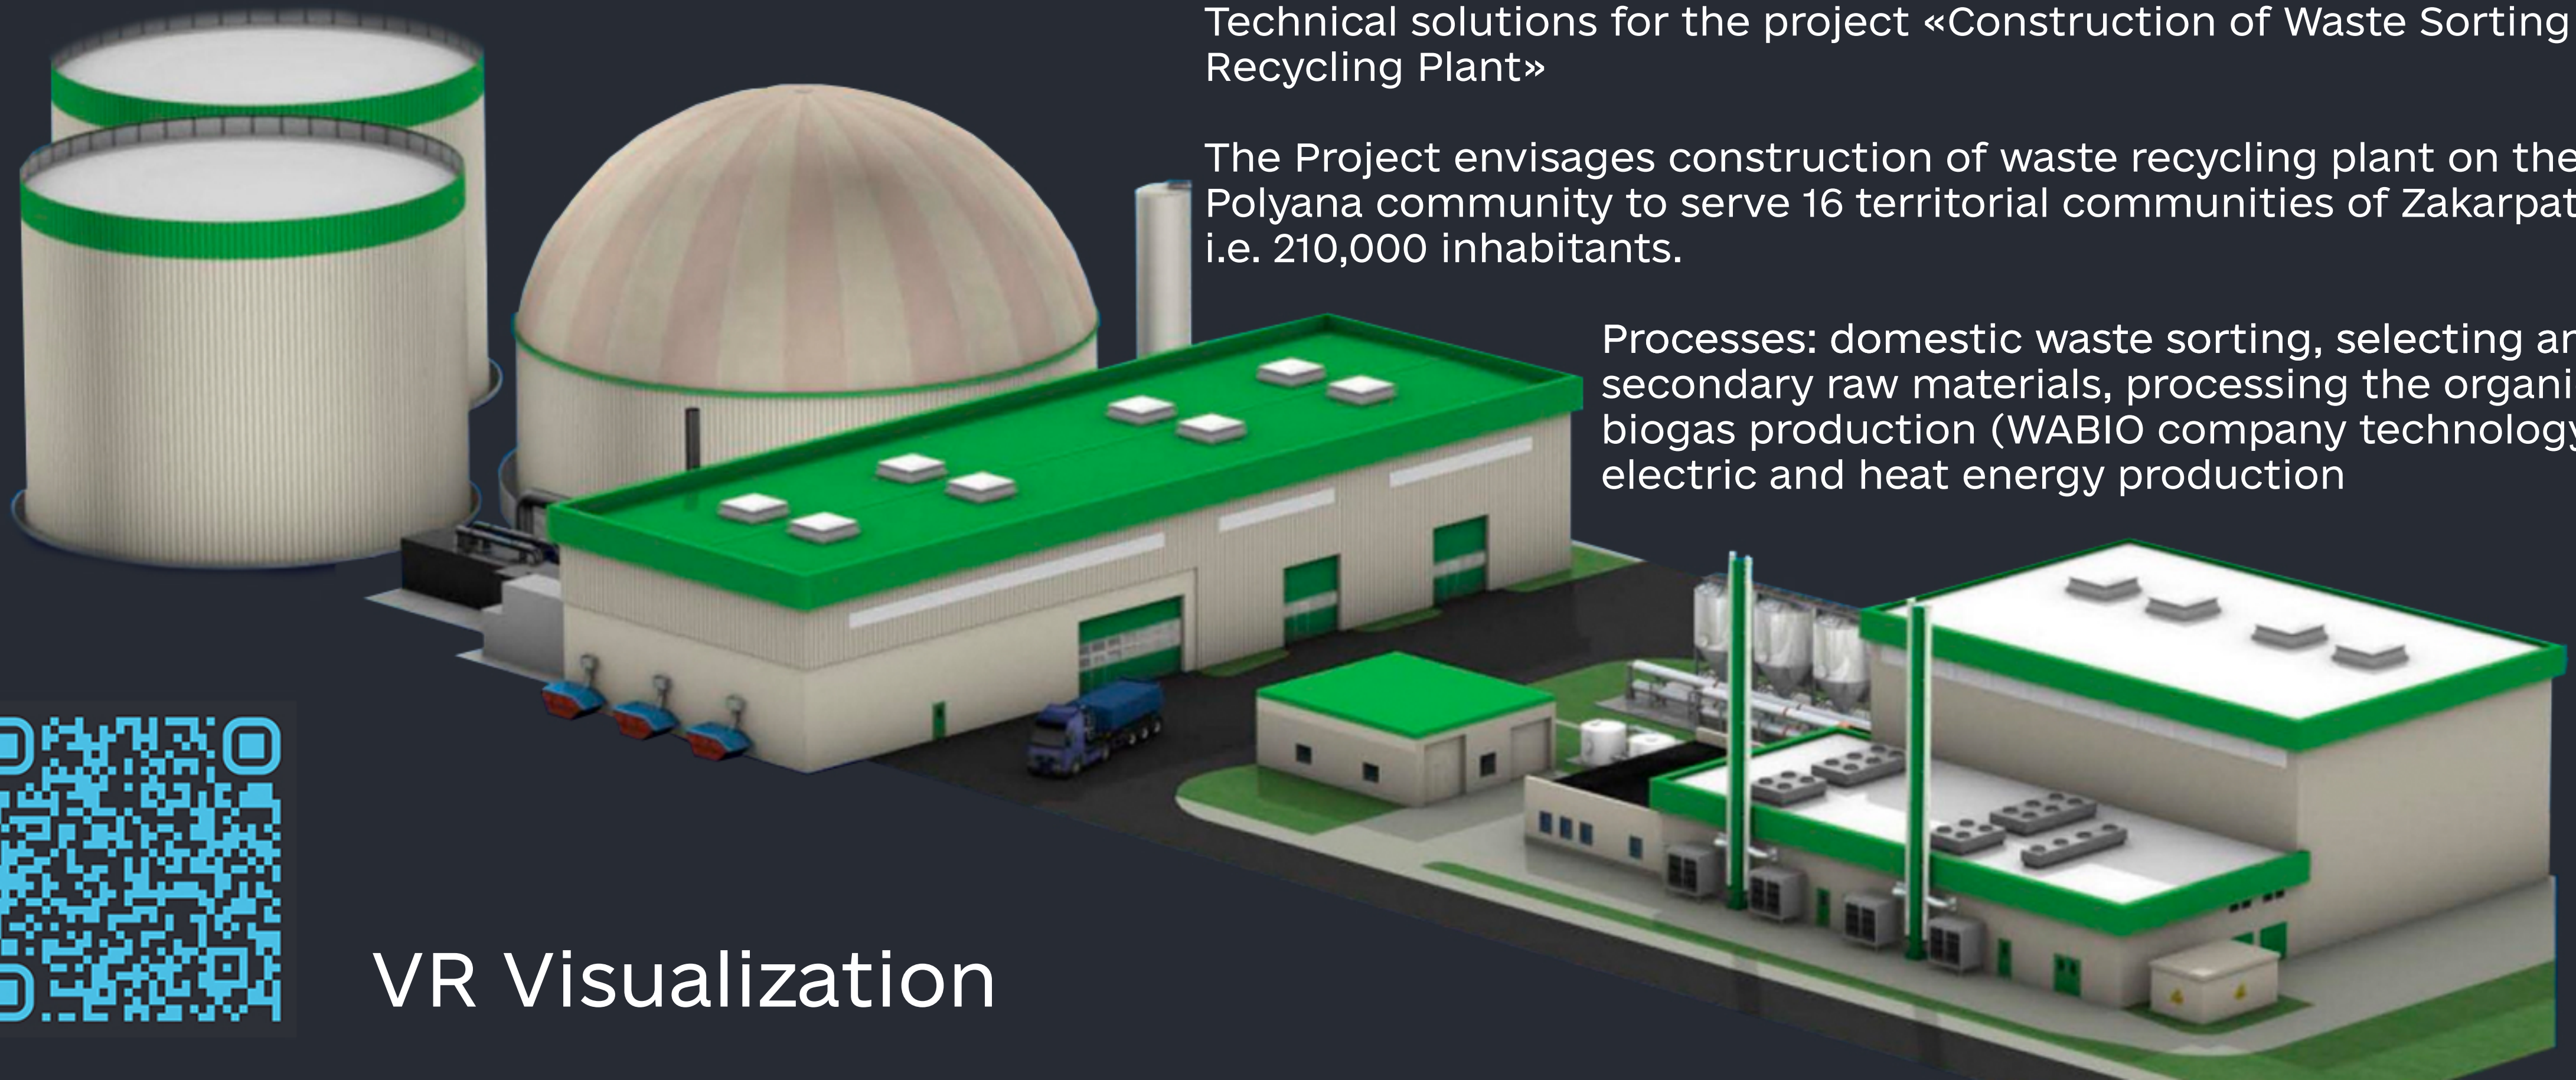

Technical solutions for the project «Construction of Waste Sorting and Recycling Plant»

The Project envisages construction of waste recycling plant on the territory of Polyana community to serve 16 territorial communities of Zakarpatska oblast, i.e. 210,000 inhabitants.

Processes: domestic waste sorting, selecting and marketing secondary raw materials, processing the organic fraction for biogas production (WABIO company technology, Germany), electric and heat energy production

Results of Cooperation Czech Republic – Telč

01. Capacity building in the sphere of environmental safety

Ukraine goes through difficult times because of the war. The number of inhabitants has significantly increased in the community that causes higher pressure and challenges for the infrastructure. There are such critical spheres as waste treatment, securing fire safety, wastewater treatment and sanitary disposal.

Results of Cooperation Hungary – Budapest
