Dear Sirs!

Вих. № 389
"28" 08 2020

Due to military aggression by the Russian Federation, the Konotop community found itself in rather difficult conditions. And although, for now, it has been possible to partially stabilize the humanitarian situation, including providing for the needs of internally displaced persons, the number of whom is constantly growing in the territory of the community, however, difficult issues remain regarding the uninterrupted operation of critical infrastructure facilities.

Konotop is the only city in the Sumy region and one of the few cities with a population of 100,000 in Ukraine that has an environmentally friendly and convenient form of public transport - the tram. The tram route network began its operation on December 25, 1949, three tram routes with a total length of 27.8 km connect the central streets with remote areas, provide access to the main objects of mass attendance: the station, hospitals, schools, enterprises, etc.. The tram became the only local public transport that worked during the siege of the community and continues to work now. But there is not enough capacity, so there is an urgent need for additional tram cars, which, unfortunately, our company does not have.

In addition, the community includes three more settlements - these are villages with which there is almost no transport connection at the moment, tram networks are not laid, access is possible only by road. However, our company does not have a car park to solve this issue.

The Konotop transport department is asking you to find an opportunity and help our company. We are in dire need of already used tram cars and buses to provide passenger transportation to the rural settlements that are part of the Konotop community.

We will be grateful to you for any material assistance to restore and establish the uninterrupted functioning of our enterprise, which was negatively affected during military operations.

Contact person: Serhii Tiahnii - commercial director of ME "Konotop transport management", +3 8 068 070 72 77, comercktu@gmail.com.

Glory to Ukraine!

Annex: on 1 page.

Sincerely
Commercial Director
ME "Konotop transport management"

Serhii Tiahnii
