

How to access simultaneous interpretation during the event

1 – Open the downloaded LiveVoice app (Android or iOS), connect your headphones to your smartphone.

2 – Enter the code **213674**, press "Join Live Event".

3 – Once you join, select the desired language of translation.

Alternatively, you can listen to the translation in an Internet browser at <https://livevoice.io/listen/213674>.

Important! If you are a speaker of the event, be sure to use headphones to listen to the translation. This is important, otherwise the sound from the smartphone will also reach MS Teams microphone and will be heard by all participants of the event.
