HISTORICAL FACTS

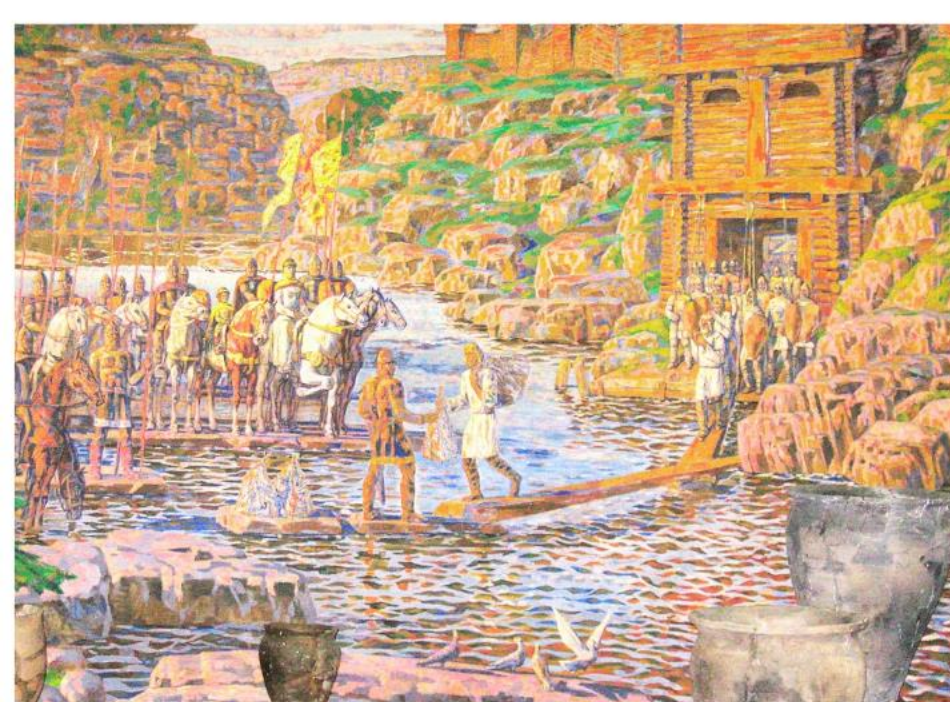

The history of Korosten goes back thousands of years.

The city was the center of the Drevlians, a powerful and numerous East Slavic tribe.

The first name is **Iskorosten**, that is, the city "bark walls" (since 705).

In 946, Princess Olga went on a campaign against the Drevlians with an army and burned Iskorosten, taking revenge for her husband, Prince Igor, who was killed by the Drevlians.

In 1918, the Trident of St. Volodymyr was approved as the coat of arms of the Ukrainian People's Republic by a resolution of the Central Rada in Korosten. In 1992, the Verkhovna Rada of Ukraine approved the trident as the **Small Coat of Arms of Ukraine**, considering it the main element of the Great Coat of Arms of Ukraine. **The trident became the official emblem of our state.**
