

The implementation of the GDPR in the practice of towns and municipalities

Implementation of the GDPR in France
share of practice
In « Département du Loiret »

Loiret
votre Département

French organization of public administrations

Population : 65 billions

- 1 State
- 13 Regions
- 101 "Départements"
- 1263 EPCI (group of municipalities)
- 35416 municipalities

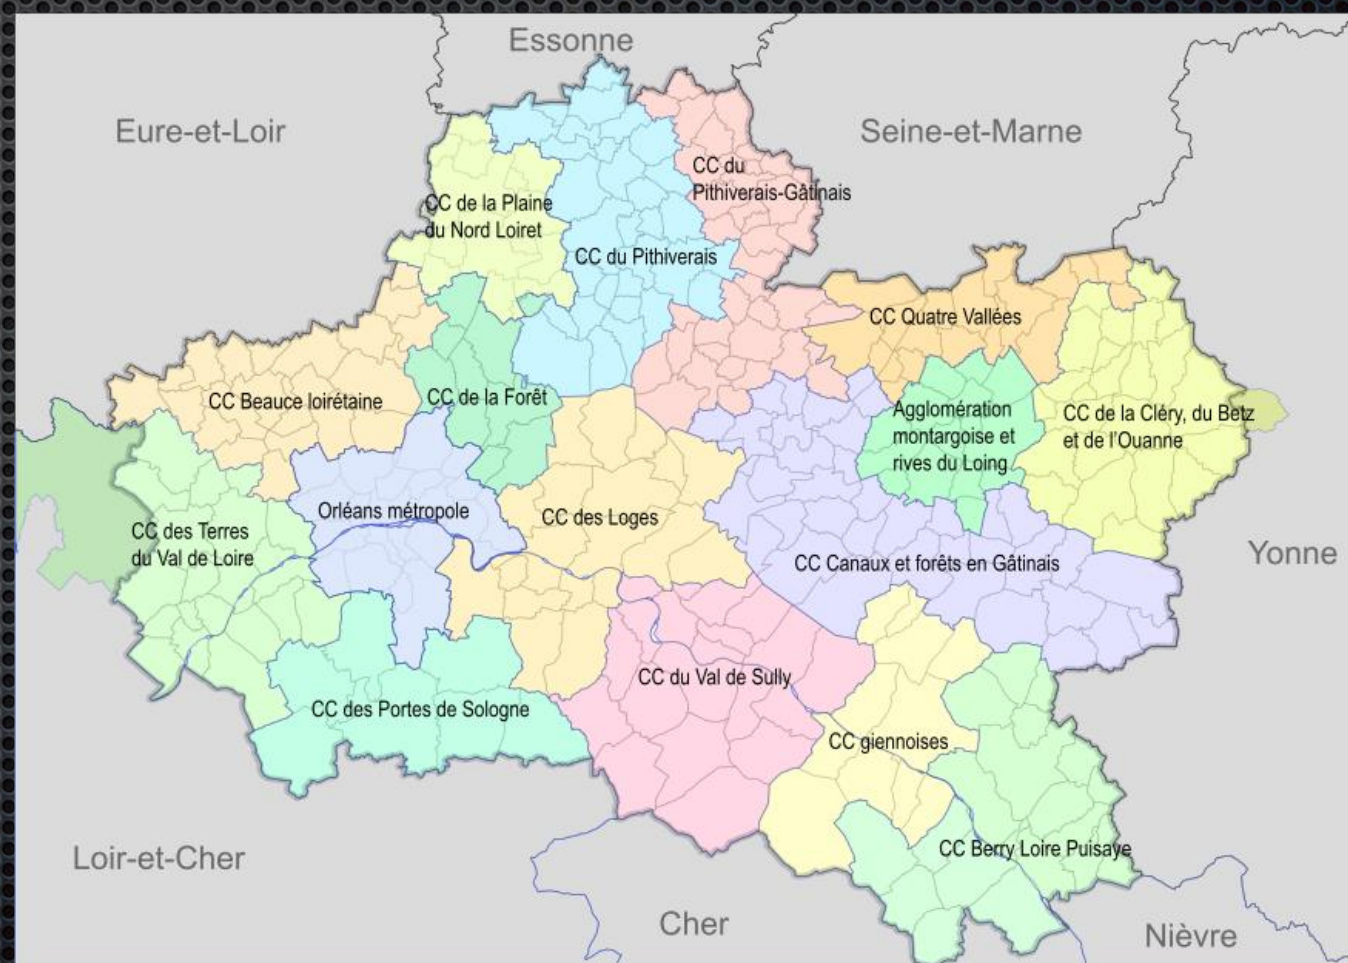

« Département du
Loiret »
Population :
675 000

Region
« Centre Val de
Loire »
Population :
2.6 millions

Is a « Département »
with :

- 16 EPCI
Population b. 6900 & 282 000
- 326 municipalities
Population b. 42 & 114 644

GDPR in France :

GDPR was « long » to start :

- 05.25.2018 : GDPR was going on
- 06.20.2018 : The law on the protection of personal data was promulgated
- 08.01.2018 : French Regulation on protection of personal data is adopted.

But, French government /Parliament want to be more efficient :

- this law & regulation adapt both GDPR and the directive EC 2016/680 of the European Parliament & of the Council (personal data in the area of criminal offences & execution on the criminal penalties).
- in 2018, some laws & regulations about cybersecurity was promulgated.

French Data Protection Authority (DPA) is called
« CNIL » : Commission Nationale Informatique et
Libertés => Liberty & Digital National Commission

It provides advises to start the GDPR :

- 1 - Designate a DPO
- 2 - Design a data map
- 3 - Define priorities
- 4 - Manage risks
- 5 - Organize process
- 6 - Document conformity

All tools helping us to work.

GDPR in « Le Loiret »

I have 2 missions :

- manage the GDPR in the « Département », our public administration,
- Advise EPCI & municipalities on the territory of "Le Loiret" about GDPR.

3 most frequently discussed subjects (public actors) :

- DPO designation
- Confusion between consent (art. 7) & public interest (art. 6 - e)
- Knowledge of the storage period of public datas

Solutions that I am developing :

- An internal network : with digital risk officer, lawyer, IT engineer, open data & filing specialists
- An external network : in my case with the DPO of all « Départements » in France
- A legal monitoring
- Training personal data correspondent previously identified in each team/organization.

Thank you for your attention
